

Course Information

Course Title: Connected Devices

Course Number: TELE 6530

Term and Year: Fall 2024

Credit Hour: 4

CRN: 20843

Course Format: In-person (Toronto) w/Livestreaming if / when appropriate and permitted as per university policy

Instructor Information

Full Name: Chengliang Huang

Email Address: che.huang – at – northeastern.edu

Office Hours: TBD

Instructor Biography

Dr. Chengliang Huang earned a PhD and a Master of Applied Science in Electrical and Computer Engineering from Toronto Metropolitan University and an MBA in Economic Management from Beijing Jiaotong University. Dr. Huang also holds a Bachelor of Science in Electronic Engineering from Fudan University.

Dr. Huang has extensive teaching experience at Toronto Metropolitan University and Ontario colleges for more than six years. The courses taught include, but are not limited to, computer programming using C/C++, Java, and Python respectively, data structure and algorithms, web design with HTML, CSS, and JavaScript, software engineering, software testing, database design and SQL, data analytics, artificial intelligence, big data analytics and its platforms, computer networks, cloud computing, wireless communications, and cybersecurity.

In addition to teaching, Dr. Huang has practical industry experience as a data scientist in a Canadian start-up and has held significant roles at Intel China Ltd and Huawei Technologies Co. Ltd. Dr. Huang is a certified Professional Engineer in Ontario.

Dr. Huang has made significant contributions to academia. Noteworthy journal publications include:

- “Performances of amplify-and-forward cooperative relay networks with different topologies” (Wireless Personal Communications, 2013)
- “Synergism of INS and PDR in self-contained pedestrian tracking with a miniature sensor module” (IEEE Sensor Journal, 2010)

Dr. Huang’s current research focuses on algorithms to mine massive datasets, particularly from the Internet of Things (IoT).

Course Description

The Connected Devices course is all about making the IoT 'work', and as such, involves substantial software development using Python, Java, Git source code management, and Linux shell scripting.

Connected Devices assignments are different than what you might normally see in a course. Each assignment serves as the basis for the next one, so it's VERY IMPORTANT that you start working on each as soon as possible, as they get progressively more difficult and can take many days to implement.

Although specialized device hardware (e.g., an SBC with attached sensors and actuators) is NOT required for the course, you will need a modern computing workstation or laptop for software development and application execution. While not required, we have used the Raspberry Pi 3 or 4 as the hardware platform for testing in the past, so it's an option for you as well. All required lab modules can technically be developed and run on a single system running Windows 11 (WSL 2), macOS, or Linux; I'll mostly be teaching and demonstrating code using either Windows 11 / WSL 2 or macOS. That said, one of the optional lab module exercises is specific to Raspberry Pi SBC's, although it is not required for the course. Lastly, the emulator in Lab Module 04 is generally easier to run in a native Linux environment, as are the exercises in Lab Modules 08 and 09.

We'll meet once weekly (almost exclusively in-person in Toronto, with a rare remote session if necessary), usually broken out into two sessions: one dedicated to context (lecture / content / discussion) and the other centered on lab-related work. As we progress through the semester, and lab modules become increasingly more challenging, labs will often occupy both sessions. We'll use Teams and / or Zoom to collaborate. It's very important that you join the Teams site to stay up-to-date and connect into our meetings. For more information and the link to join, please see the course Canvas site.

Course Learning Outcomes

Upon successful completion of this course, students are expected to understand, and build the software necessary to support, the following core IoT concepts and technologies:

- IoT architectures (edge to cloud)
- Edge-specific sensing and actuation concepts
- Data simulation, emulation, and management / translation
- MQTT as an IoT messaging protocol
- CoAP as an IoT messaging protocol
- Connected device integration basic analytics concepts
- IoT-specific cloud integration concepts

Required Tools and Course Textbooks.

Programming the Internet of Things, by Andy King ISBN-13: 978-1-492-08141-8

Course Schedule/Topics Covered.

| Week | Date | Part | In Class Topic | Type |
|------|-------|------|--|----------------------|
| 1 | 09/04 | 01 | Foundational Concepts and DevOps: IoT Systems Concepts | Lecture/Lab |
| 2 | 09/11 | | IoT Architectures and Edge Computing Basics | Lecture/Lab |
| 3 | 09/18 | | Quiz No. 1 (Part 01) | Lecture/Quiz |
| 4 | 09/25 | 02 | Data Simulation and Emulation | Lecture/Lab |
| 5 | 10/2 | | Data Management and Integration | Lecture/Lab |
| 6 | 10/9 | | Quiz No. 2 (Part 02) | Lecture/Quiz |
| 7 | 10/16 | 03 | MQTT Client – Part 01 of 02 | Lecture/Lab |
| 8 | 10/23 | | MQTT Client – Part 02 of 02 | Lecture/Lab |
| 9 | 10/30 | | CoAP Server | Lecture/Lab |
| 10 | 11/6 | | CoAP Client | Lecture/Lab |
| 11 | 11/13 | | Edge Integration | Lecture/Lab |
| 12 | 11/20 | | Quiz No. 3 (Part 03) | Lecture/Quiz |
| 13 | 11/27 | 04 | Cloud Integration | Lecture/Lab |
| 14 | 12/4 | | Quiz No. 4 (Part 04) | Lecture/Quiz |
| 15 | 12/11 | | Final Project Completion and Presentation | Project Presentation |

Coursework weights

| | |
|----------------------------|-----|
| Assignments / Lab Modules | 25% |
| Final Project | 20% |
| Final Project Presentation | 5% |
| Quizzes | 50% |

Grading Scale

| | | | |
|-------------|-------------|-------------|------------------|
| 95-100% A | 87-89.9% B+ | 77-79.9% C+ | 69.9% or below F |
| | 84-86.9% B | 74-76.9% C | |
| 90-94.9% A- | 80-83.9%B- | 70-73.9% C- | |

Attendance/Late Work Policy

Attendance Policy

Students registered in MGEN courses (INFO, CSYE, and DAMG) are allowed **a maximum of 2 absences per course, with 3 or more absences resulting in an automatic 'F' for that course.** Students are expected to inform their instructors of any absences in advance of the class; if a student is sick long-term or experiences a medical issue that prevents class attendance, it is strongly encouraged that they speak with their Academic Advisor (coe-mgen-gradadvising@northeastern.edu) to learn more about the Medical Leave of Absence. Should a student anticipate being unable to attend 3 or more classes, they should discuss their situation with their Academic Advisor to explore other types of leave in accordance with the University's academic and global entry expectations. International students should review the Office of Global Services webpage to understand their visa compliance requirements.

Teaching Assistants (TAs) or Instructional Assistants (IAs) will be present at each class to collect student attendance.

Late Work Policy

Students must submit assignments by the deadline in the time zone noted in the syllabus. Students must communicate with the faculty prior to the deadline if they anticipate work will be submitted late. Work submitted late without prior communication with faculty will not be graded.

End-of-Course Evaluation Surveys

Your feedback regarding your educational experience in this class is particularly important to the College of Engineering. Your comments will make a difference in the future planning and presentation of our curriculum.

At the end of this course, please take the time to complete the evaluation survey at <https://neu.evaluationkit.com>. Your survey responses are **completely anonymous and confidential**. For courses 6 weeks in length or shorter, surveys will be open one week prior to the end of the courses; for courses greater than 6 weeks in length, surveys will be open for two weeks. An email will be sent to your Northeastern University Mail account notifying you when surveys are available.

Academic Integrity

A commitment to the principles of academic integrity is essential to the mission of Northeastern University. The promotion of independent and original scholarship ensures that students derive the most from their educational experience and their pursuit of knowledge. Academic dishonesty violates the most fundamental values of an intellectual community and undermines the achievements of the entire University.

As members of the academic community, students must become familiar with their rights and responsibilities. In each course, they are responsible for knowing the requirements and restrictions regarding research and writing, examinations of whatever kind, collaborative work, the use of study aids, the appropriateness of assistance, and other issues. Students are responsible for learning the conventions of documentation and acknowledgment of sources in their fields. Northeastern University expects students to complete all examinations, tests, papers, creative projects, and assignments of any kind according to the highest ethical standards, as set forth either explicitly or implicitly in this Code or by the direction of instructors.

Go to <http://www.northeastern.edu/osccr/academic-integrity-policy/> to access the full academic integrity policy.

MGEN Student Feedback

Students who would like to provide the MGEN unit with anonymous feedback on this particular course, Teaching Assistants, Instructional Assistants, professors, or to provide general feedback regarding their program, may do so using this survey: https://neu.co1.qualtrics.com/jfe/form/SV_cTIAbH7ZRaaW0Ki

University Health and Counseling Services

As a student enrolled in this course, you are fully responsible for assignments, work, and course materials as outlined in this syllabus and in the classroom. Over the course of the semester if you experience any health issues, please contact UHCS.

For more information, visit <https://www.northeastern.edu/uahcs>.

Student Accommodations

Northeastern University and the Disability Resource Center (DRC) are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act (ADAAA) to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that demonstrates a current substantially limiting disability.

For more information, visit <https://drc.sites.northeastern.edu>.

Library Services

The Northeastern University Library is at the hub of campus intellectual life. Resources include over 900,000 print volumes, 206,500 e-books, and 70,225 electronic journals.

For more information and for education specific resources, visit <https://library.northeastern.edu>

Diversity and Inclusion

Northeastern University is committed to equal opportunity, affirmative action, diversity, and social justice while building a climate of inclusion on and beyond campus. In the classroom, members of the University community work to cultivate an inclusive environment that denounces discrimination through innovation, collaboration, and an awareness of global perspectives on social justice.

Please visit <http://www.northeastern.edu/oidi/> for complete information on Diversity and Inclusion

Title IX

Title IX of the Education Amendments of 1972 protects individuals from sex or gender-based discrimination, including discrimination based on gender-identity, in educational programs and activities that receive federal financial assistance.

Northeastern's Title IX Policy prohibits Prohibited Offenses, which are defined as sexual harassment, sexual assault, relationship or domestic violence, and stalking. The Title IX Policy applies to the entire community, including male, female, transgender students, faculty, and staff.

In case of an emergency, please call 911.

Please visit <https://www.northeastern.edu/ouec> for a complete list of reporting options and resources both on- and off-campus.
